The Word "Widow."

As a word "widow" is most interesting. Max Mueller traced it back through thousands of years with hardly any change of form or meaning. "The word at its original formation meant simply a woman left without a man, just as it does today, and it has remained all these ages materially unchanged both in sound and meaning." A thousand years ago the Anglo-Saxons used the word in England and north Germany. The Anglo-Goths had, earlier than they, the Latin people know it centuries before the Anglo-Saxons, and the Sanskrit records show that a thousand years before Latin was written the same word was spoken on the slopes of the Himalayas.

L. H. Hooker, retired, of 101 Prospect street, Barre, Vt., says: "Doan's Kidney Pills, which I got at E. A. Drown's, did me more good than all the prescriptions and other remedies I ever used. Over eight years ago I gave a statement for publication telling what they had done for me, and today I have even more confidence in them than I had at that time. I had suffered for a long time from kidney complaint, and it finally became so bad that my condition was considered serious. My back ached nearly all the time, an annoying urinary difficulty existed and the action of my kidneys was disordered. I used every remedy I heard of, but without beneficial results until I at last resorted to Doan's Kidney Pills. I used in all five boxes and received wonderful relief. I use this remedy occasionally now, and have recommended it to dozens of people, many of whom have been so greatly benefited that they have come back and thanked me for telling them of this valuable medicine."

Cashier H. N. Mattison went Saturday afternoon to Bellows Falls to spend Sunday with friends.

Al Martz Comedy company are billed to entertain the people of Chelsea at the opera house Tuesday evening.

The Sunday Memorial services at the Congregational church drew a large attendance and the Rev. Fred Daniels, the local Methodist pastor, delivered a most able sermon. The attendance of the old soldiers was not as large as last year, due to the illness and infirmity of some who otherwise would have been in the ranks.

On Thursday evening, May 23, the 25th anniversary of the marriage of Mr. and Mrs. Charles Hunt was observed, when nearly 40 of their neighbors and friends called upon them to remind them that they had reached the quarter century mark of wedded life and leave with them reminders of their respect, esteem and good wishes. Among the contributions was a purse of fifteen dollars in money, two silver pie forks and a rocking chair. The evening was a pleasant one for the host and hostess as well as their guests, entirely informal, and the party dispersed at ten o'clock with wishes that the couple in whose honor they had met might celebrate the occasion again twenty-five years hence.

In New York's Swell Restaurants.

The tables that appear to be reserved in the fashionable Fifth avenue restaurants are very rarely occupied by the persons whose names appear on the slip which the waiter sticks into a glass to show that Mr. Smith or Mr. Jones is expected. "We have to put some tables out of the reach of the public," one of the head waiters told a reporter, "as there are certain patrons whom we could not afford to send away. The only way of doing that is to pretend that we are reserving the tables for somebody. Then when a patron whom we could not possibly refuse arrives and must have a place we can always tell him that the table was taken, but that the parties have not turned up. That satisfies him and keeps other guests quiet as well."—New York Sun.

Gravitation.

As a supposed innate power was noticed by the Greeks and also by Seneca, who speaks of the moon attracting the waters, about 38 B. C. Kepler investigated the subject about 1615, and Hooke devised a system of gravitation about 1674. The principles of gravity were demonstrated by Galilei at Florence about 1633, but it was not until the great Newton stepped upon the stage that the matter was fairly settled. The others had guessed. Newton proved, and to Newton unquestionably belongs the high honor of having shown us the true mechanism of the heavens.—New York American.
